

V701

BRASS BALL VALVE

Product Description

TVN701 Full Port Nickel-Plated Brass Ball Valves offer greater corrosion resistance over normal brass ball valves. The 25 bar (water, oil and gas) full port size reduces both cavitation and pressure drop. They feature a blowout-proof stem and an easy-turn handle. The ball valve includes female connections.

Technical Data	
Size range	DN15 - DN100
Pressure range	PN10 - 16 - 25
Temperature	-10°C to +110 °C
Design	EN 13547
Face to face	EN 13547
Connection	Threaded EN ISO 228-1
Coating	Nickel Plated Brass
Testing	EN 12266-1
Marking	EN 19

Application Range

- Housing heating & cooling applications
- City water network
- Hot water and compressed air installations
- Steam
- Compressed air installations
